SUPPLEMENTAL AMMENDENT

Sir:

After having received notice from your office that my petition to withdraw the holding of abandonment has been granted, I am respectfully requesting that the assigned examiner consider a minor wording change in the patent claim. I believe this would fit under your rules for a supplemental ammendment with no "new matter" as I am filing this request before the next office action.

Please find details of the requested wording change on the next (attached) page sent along with this fax.

I certify I have transmitted this paper by fax to the Patent & Trademark Office at: (571) 273-8300 on August 10, 2005.

Respectfully submitted,

Michael Borges

Attn: Examiner Horton

The current claim "12" (new), contains this wording in the 5<sup>th</sup> paragraph:  
... said reflective inner wall being a metallized plastic and said reflective inner wall being constructed of an air bubble material, and;

Please note that I am requesting a change from the bold & underlined words "metallized plastic" to the following words: "an optically reflective material".

Hence, the old wording of metallized plastic would be replaced with new wording as shown above, to make that whole paragraph read like this:

... said reflective inner wall being a an optically reflective material and said reflective inner wall being constructed of an air bubble material, and; (new words shown underlined in bold.)

This wording change allows for inclusion of various kinds of available reflective films available in today's lighting markets without changing the scope or intent of the specifications or claims. This change is believed to not add "new matter" to the invention or claims thereof.

Thank you for considering this requested wording change to my current (new) claim number twelve (12) in paragraph five (5).

Please feel free to contact me, if needed, to expedite this matter.

Respectfully,

Michael Borges
